

California: ForestDiffusion and matched DOPE / CTGAN / TVAE validation

Fit seed 23 · three sample seeds · bars: sample median · whiskers: sample min/max

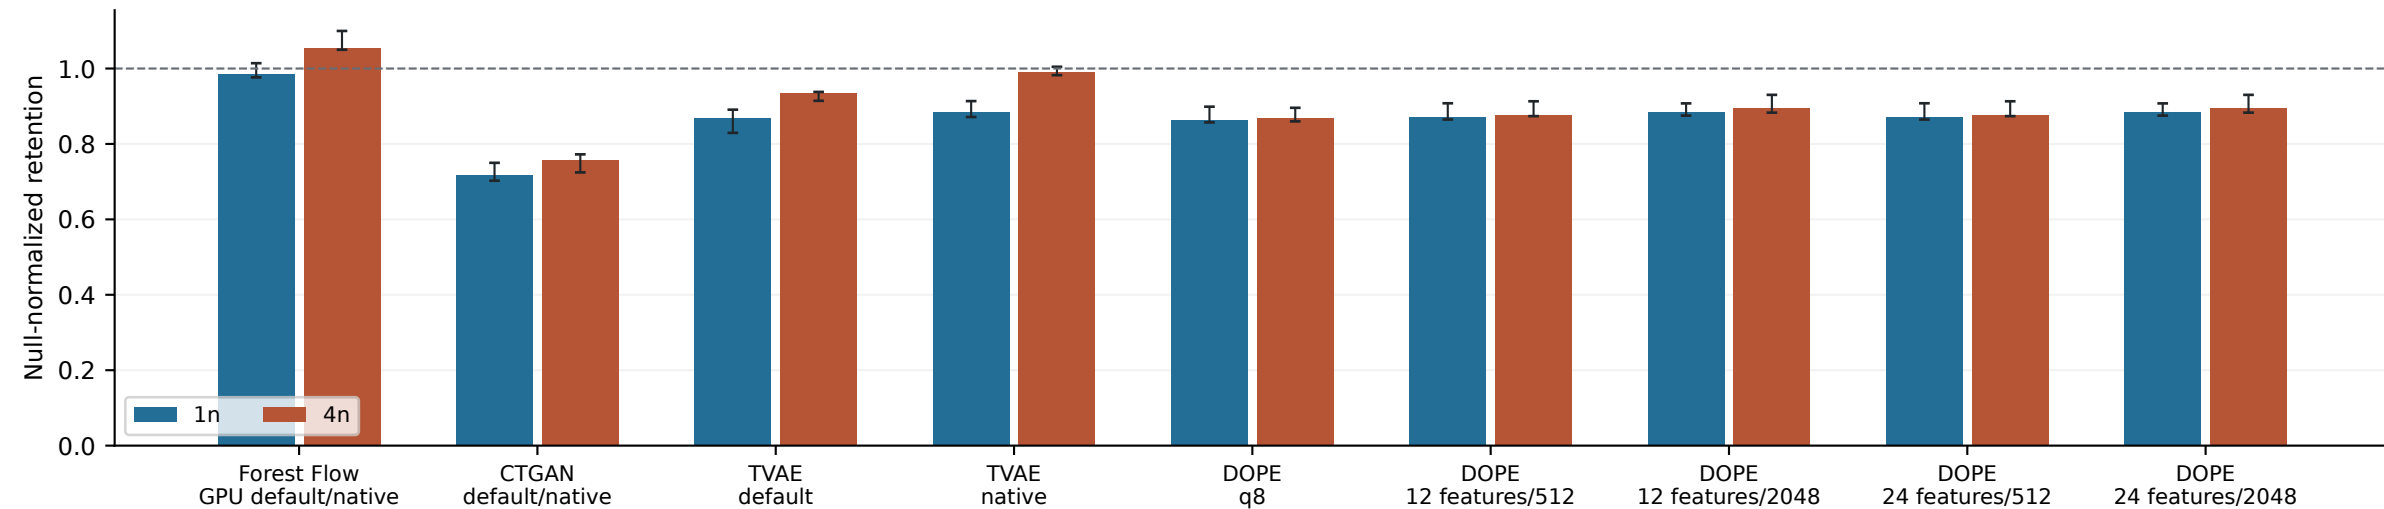

Catboost

Linear

MLP

Unconstrained common quality: baselines exceed L3; DOPE artifacts fit L3. No release certification or superiority claim.

All DOPE profiles retained; no global candidate family selected. Forest default/native share one fit and samples.

Official-training-derived validation · official tests sealed · MFS-v2 / PTF-v1 / release-safe null · L3 cap 10,240 bytes
